

## New Features Added to the H2 Covert Hand-Held Siren

Code 3, Inc. has added several new features to the popular H2Covert™ Siren. This remote siren system, with an easy-to-operate hand-held (H2) controller is perfect for unmarked vehicles or where interior vehicle space is at a premium.

To improve ease of operation and user safety, more than a dozen improvements have been incorporated into the design. An eight second gunlock timed output function and siren lock are now both standard features. Volume adjustments for the public address system are made by a thumbwheel on the hand-held controller.

The H2 Covert Siren now also includes a Whoop tone, Instant On, EU Lock to any Level, Backlight Off Option on the Keypad and Park Kill with Level 3 Drop-Out Option.

The H2 Covert Siren meets SAE J1849, 2004/104/EC and California Title 13 Guidelines.
