

RX 2700CC™ MC LED LIGHTBAR

NEW!

- MultiColor (MC) Capability with latest LED dual color technology 20% brighter than any competitive MultiColor technology
- Two full signals out of one lighthouse — No more compromising signal strength and size by splitting a LED
- MultiColor is used in the rear, red/blue modules can change directly to a full size NarrowStik
- Turn a red/blue lighthouse into a white takedown. This provides increased takedown lighting at no additional cost or loss of emergency warning positions.

SINGLE XT4/XT6MC LED LIGHTS

XT4MCRW (Red/White)

XT6MCBA (Blue/Amber)

- Single Head XT4 and XT6 lights now have MultiColor capability. Flash one solid color and then another solid color instead of having either a single color or split colors
- Blue, Red, Amber or White LEDs (Solid Color Modules Only) with Clear Lens
- Select any two colors (above) for MultiColor Function
- Multiple Heads can be Synchronized to other MultiColor Lights
- 30 Flash Patterns
- 5 Year Warranty on LEDs

PAR36MC LED LIGHTS

- Flash one solid color and then another solid color instead of having only one single color.
- Easily installs into existing fog light positions for Charger and Tahoe
- 26 Flash Patterns
- Red/White, Red/Blue, Blue/White or Amber/Blue LEDs with Clear Lens
- Multiple Heads can be Synchronized to other MultiColor Lights
- 7 LEDs per Head
- Weather-Protected Design
- Shock Resistant
- 5 Year Warranty on LEDs
