

CODE 3 LIGHTBAR COLLECTION

DEFENDER

This World Class Bar is the brightest on the market and is 2-2.5x brighter than any lightbar at key 45° and 60° intersection angles. Available in MultiColor and Single Color Lighthouse with sizes 23" to 94".

RX 2700 CC

PriZm II Technology – the most advanced dual reflector LED technology providing a bright lighting signal for superior visibility and safety. Full range of options allows you to customize the lightbar to meet your specific requirements. The MultiColor lightbar uses the latest LED dual color technology to provide intense color that is 20% brighter than any competitive Multi-Color technology. Sizes from 18" to 91".

SOLEX

Innovation Taking Shape

Solex incorporates a modern, cutting-edge design that is both aerodynamic in appearance and performance, providing all the capabilities and more from the leader in innovative emergency lighting. Second level allows for additional massive takedown lighting, additional flashing or steady burn warning lights, a 100-watt speaker with no loss of rear warning light capability, traffic emitters, and other potential warning or add-on devices. Available in MultiColor or Single Color and 47" length.

TRIUMPH

The most capable and modern full 2-Level lightbar ever! 2 levels of 360 degree light, even on the ends of the lightbar. 3 levels of lighting possible in center section, both front and rear. Available in MultiColor or Solid Color and 47", 60", 73" & 86" lengths.

21TR & 21TR Plus

21TR is economical, yet advanced and offers standard features while providing the brightest basic lightbar on the market. 21TR Plus is a full featured, economical lightbar with superior directional and off-angle performance. Features include the NarrowStik, flashing takedowns and alleys, and corner cruise lights. Available in MultiColor and Single Color with sizes from 22.5" to 91".

See the Code 3 website for more product information, models, videos, flash patterns and more.
