

## Z3™ Siren

World class siren - easy to operate control head

Z3 in center console  
on PI Utility

Backlit brightness is now officer adjustable just like the dashboard dimmer switch giving drivers the appropriate lighting for their eyes

### DESIGN FEATURES/OPTIONS

- Easy to operate with three distinct zones: sirens and primary lighting (red), auxiliary lighting, and other equipment (blue), and traffic or warning function (yellow)
- Public Address (PA) stuck mic sensor automatically returns the siren to normal function should the microphone switch get stuck in PA mode and microphone volume is adjustable
- Built in "Battery Voltage Check" sensor shuts down lights, and sirens when voltage runs below a programmed setting. No more dead batteries after a call
- Sleep Mode Timer to shut the lights and siren off after a specific preset time if the ignition is turned off
- Horn-ring transfer allows you to effortlessly scroll through siren functions on the steering wheel without having to take your eyes off the road
- Built-in "Park Kill" to automatically turn light and siren functions off when the vehicle is put in park. This feature is also designed for positive or ground inputs so that "Park Kill" can also be activated by other inputs
- Built-in siren lock function that does not allow siren tones to come on until emergency lighting is activated
- Different size, and shape buttons are quickly found allowing operation of all lights, and siren functions without taking eyes off the road. Buttons are also backlit and change color
- Programmable three level slide switch with a programmable fourth position
- Eight programmable auxiliary buttons (two can be programmed for positive or ground switching)
- Five programmable siren buttons (program different tones for each one)
- ArrowStik® can be programmed for different flash patterns, and speeds, as well as the warning flash pattern itself
- Z3 amplifier special serial port needs only a simple data cable to connect to the Defender and RX2700CC lightbars
- Banshee siren amp compatible for additional features

### SPECIFICATIONS

- Control head: 6.80"L x 3.30"H x 1.07"D (switch will increase depth dimension to 1.95"D (50 mm), (172 x 84 x 27 mm)
- Amplifier: 9.750"L x 6.83"W x 3.94"H (248 x 173 x 100 mm)
- Light control current load
- 3-Level switch, 4 outputs, 50 amps maximum combined total
- Auxiliary switches A thru D: 5 amps maximum each aux
- Auxiliary switches E thru H: 10 amp maximum each aux
- Total siren output capacity: 200 watts (can drive two 100 watt speakers)
- Operating voltage: 10-15VDC (negative ground)
- Meets SAE J1849, California Title 13, Reg 10 compliant, and 2004/104/EC when properly configured
- 5-year warranty
