Dimensions

Beacon only: 12.5"W x 7"D x 2.7"H
Beacon w/ foot: 12.5"W x 7"D x 3.9"H

Next, remove the five screws attaching the beacon to the mounting foot. Set these fasteners aside. Separate the beacon from the mounting foot.

Place the mounting foot where it is to be assembled to the vehicle and mark the locations. The holes are large enough for 1/4" fasteners (not included). After the mounting foot is installed, route the cable through the hole in the foot and reassemble the beacon to the foot. Assemble the lens cover to the top to complete the assembly.

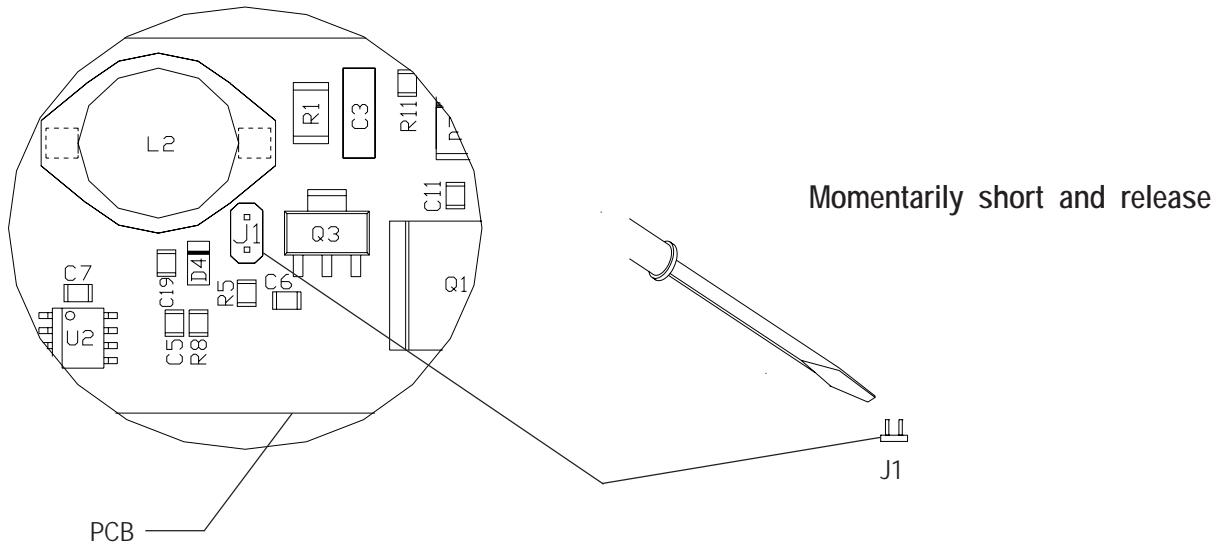

LED MODULES

Flash patterns can be changed by shorting the 2-pin header, J1 on the green PCB as shown below, momentarily, then releasing. The table below shows the available patterns and the order when stepping through patterns. The module can be reset to "Cycle flash" by shorting the header for greater than 5 seconds and releasing.
